Examiner's Statement of Reasons for Allowance			XIA) WU PRIMARY EXAMINER	

## **DETAILED ACTION**

## Allowable Subject Matter

1. Claim 8 (renumbered as 8) is allowed.

## **Reasons for Allowance**

2. The following is an examiner's statement of reasons for allowance:

Omae et al. (USPN 5963283) teach a liquid crystal panel and projection display device for enlarging and projecting to a screen (176), where images displayed on a small liquid crystal panel (177) are enlarged and projected using project lens (174). Omae et al. disclose an LCD layer with sides of substrate (11, 12) as shown in Fig 1 and indicate specific electrode pattern on a circuit board (column 1, lines 9-15, 20-23, column 2, lines 6-15, and column 4, lines 13-21, and Fig 21).

None of the cited prior art teaches or suggests a projection display apparatus comprising a display panel comprising a rectangular substrate having four sides including first and second pairs of opposite sides, and a plurality of electrodes disposed along only the first pair of opposite sides; a circuit board provided with a drive circuit for driving said display panel; a projection lens support provided with a projection lens fro projecting an enlarged image onto a screen; and a holder for holding said display panel and provided with positioning means for positioning said holder and said projection lens support, wherein said projection lens support is positionally aligned and connected with said display panel via said holder by said positioning means, and wherein said display panel, said projection lens support, and said circuit board are integrally fixed by fixing screws,

Art Unit: 2674

and said plurality of electrodes and circuit board are electrically connected by said fixing screws, wherein said display panel further comprises shift registers disposed along said four sides, and converters for converting digital signals to analog signals, said converters being disposed along two sides of said substrate.
